

Moving your iTunes Library

1. Copy your entire iTunes Music folder. Usually this folder is in your Music folder.

2. Go to your new location (usually an external HD) and paste the folder.

3. Now you need to configure iTunes to find the new location. To do this - hold down the shift key and double click the iTunes icon. Keep holding the shift key until you see a window that lets you Choose iTunes Library. Click Choose Library...

4. Navigate to your new location (usually external HD). Open the iTunes folder and select the iTunes Library file. Click Open. You should see all your music in iTunes. From now on iTunes will look for the library file in your new location (usually external HD).
